LOT 132: YORK INTERNATIONAL - HTML DRIVEN EMBEDDED CONTROLLER FOR BUILDING AUTOMATION PATENTS FOR SALE

132号专利包：约克国际 – 用于建筑自动化的 HTML驱动嵌入式控制器专利待拍

Ocean Tomo Bid-Ask™ Market patent auction lot 132 consists of five global patents from York International with protection in the United States, Europe, Canada, and China. This invention is directed to a system and method for providing data and information from particular items of controlled building equipment, such as HVAC systems, to a user. A controller collects and serves data to a website generated by a web server in the controller. The website can be accessed and reviewed by remotely located users on remotely located devices, and can simultaneously be accessed and displayed by other users, including users accessing a local display preferably located on or in proximity to the controlled equipment. Whether in local or remote access mode, the website allows authorized users to control the equipment, and to independently control the display of the data from the equipment. The portfolio will provide defensive protection to major integrated web services providers and HVAC, security, and utilities integrated hardware providers.
