# LOT 185: INNOVATIVE ANTI-COUNTERFEITING SYSTEM PATENTS FOR SALE

## 185号专利包:创新防伪系统专利待拍

Ocean Tomo Bid-Ask Market<sup>®</sup> platform patent auction lot 185 presents a unique portfolio comprising a U.S. patent and a European patent, introducing an innovative system that fights counterfeit coins and gold bars. This system redefines authenticity verification, eliminating the need for time-consuming metallurgical tests. It adds a protective layer which is a thin cover around the valuable item and hides a readable security code with tamper-resistant features, enabling rapid identification and authentication of valuable items. The technology's uniqueness lies in its ability to instantly match the embedded code with a secure database or blockchain, ensuring a tamper-proof authenticity history for each item. This portfolio represents an invaluable opportunity for manufacturers of precious metals and entities involved in the gold trade. The portfolio offers a unique solution for swift, reliable transactions and setting a new benchmark in anti-counterfeiting practices for high-value assets.
