## **Particulate Polymer Materials Patented Technology Available for sale on the Ocean Tomo Bid-Ask™ Market**

*Materials patents issued by US, European and South African patent offices related to particulate polymers relevant to lithium ion battery production, water filtration and purification industries auction on the Ocean Tomo Bid-Ask™ Market.*

CHICAGO, IL (February 24, 2020) [Ocean Tomo Transactions](#), LLC will auction a portfolio of assets that disclose the use of a porous particulate polymer material as a support for an active agent that is either organic or inorganic. The invention in [patent auction lot 102](#) on the Ocean Tomo Bid-Ask™ Market, provides for a particulate polymer material produced as a micrometer-sized sphere with high adsorption capacity for both metal ions and small organic molecules. In addition, the particulate polymer material can be easily dispersed in all common thermoplastic materials and used as a template to produce hollow silica shells.

The patents in this lot have a priority date of May 5, 2004 and would be of interest to manufacturers in the \$37.4 billion lithium ion battery market. The particulate polymer material technology would also be of interest to cosmetic and personal care suppliers, plastics additive producers, and companies in the \$37.4 billion water filtration and purification market.

The versatility of these particles for commercial application is highlighted by the inventor, Dr. Daniel Lynch, “the patent covers the rare example of one-pot reaction that produces uniformly sized and shaped particles with unique absorption properties”.

To request bidder credentials or for further information on this auction or other auctions on the Ocean Tomo Bid-Ask™ Market, contact Layna Guo at [Layna@OTI.com](mailto:Layna@OTI.com) or 1-312-327-8179.

### **About the Ocean Tomo Bid-Ask™ Market**

The [Ocean Tomo Bid-Ask Market](#) is an open on-line platform to buy and sell patents. This market is an important step forward, both as a simplified solution for patent transactions as well as a source of information on patent pricing. The Ocean Tomo Bid-Ask Market uniquely combines the efficiency of an online platform with an experienced team of brokers fluent in both English and Mandarin. The market uses standard transaction documents and is open, transparent and free to view.
