## **Patents and Website for an Integrated Vessel Monitoring and Control System Available on the Ocean Tomo Bid-Ask™ Market**

*Ocean Tomo Bid-Ask™ Market announces the auction of patents and a website for an Integrated Vessel Monitoring and Control System which allows for private long-range tracking, bi-directional communication, and collision avoidance enhancing safe and efficient vessel operation.*

Chicago, IL (February 3, 2021) Ocean Tomo Transactions, LLC will auction a portfolio of patents and a website for an Integrated Vessel Monitoring and Control System through the Ocean Tomo Bid-Ask™ Market, [auction lot 131](#). The offering includes a private, expandable microprocessor-controlled or computer-controlled system to improve the monitoring and control functions necessary for safe and efficient vessel operation. The integrated monitoring and control system operates as a hub for bi-directional communications with vessel systems. The system also offers a vessel “black box”, which can be accessed remotely, for storing operational data collected by a plurality of sensors. The system is also applicable to a fleet of vessels, offering simultaneous or independent monitoring and control functionality for the entire fleet. The portfolio provides an opportunity for a private, integrated fleet tracking and monitoring system for companies in the freight forwarding, fleet management, cruise, yachts, oil rig, insurance, and logistics fields.
