# LOT 124: LIGHTWEIGHT, STOWABLE, PANORAMIC, LEAKPROOF VEHICLE HARDTOP STRUCTURE PATENTS FOR SALE

## 124号专利包：轻巧、便携、全景、防漏式车辆硬顶结构专利待拍

Ocean Tomo Bid-Ask™ Market patent auction lot 124 contains a U.S. patent, prototype, and website. The patent describes a hard-top structure for a vehicle having a roll-bar cage. Desirable features and characteristics of the present patent include simple, lightweight and on-the-go stowable window panels. One person can easily remove the panels to make the vehicle convertible. Further, thin and lightweight removable windows allow the user to store the removed windows within the vehicle with little reduction in cargo capacity. Also, the hard-top structure provides an open-air environment for the vehicle, with panoramic views. The patented hardtop structure combines the functionality and features of both a traditional hard top and soft top roof into a single system. The panoramic hybrid hardtop can be applied to any vehicle with an exposed roll-cage, such as Jeep-type utility vehicles.
