LOT 178: CARD GAME WITH AUCTION FUNCTION PATENTS FOR SALE

178号专利包:具有拍卖功能的卡牌游戏专利待拍

Ocean Tomo Bid-Ask TM Market patent auction lot 178 presents a U.S. patent 9076300 introducing an exciting auction system where players can bid for specific cards during the game. A computer oversees the auction, and rules like bidding time, the number of cards, and spending limits can be adjusted. The real-time display shows players' bids, spending limits, and who's winning. What's intriguing is that the second-highest bidder will be awarded the amount of the winning bid, and this opens up an extra dimension in which a player can compete both to win the card game and to be the second-highest bidder. This innovation isn't just for card games; it could also be used in things like competitive discounts and promotions, making it versatile and fun for a wide audience. Companies seeking to enhance customer experience of online card games would find value in this patent portfolio.
